Training Parameters in PyTorch

LATEST SUBMISSION GRADE

100%

1. What does the following line of code do :   `1 / 1 point`

w.grad.data.zero_()

○ calculate the iteration

◉ zero the gradients before running the backward pass

○ update parameters

✓ **Correct**
correct

2. What does the following line of code do :   `1 / 1 point`

w.data = w.data - lr * w.grad.data

◉ update parameters

○ zero the gradients before running the backward pass

○ calculate the iteration

✓ **Correct**
correct
